

Skoog and GarageBand:

Summary: This guide will show you how to play GarageBand instruments using Skoog. You will set the notes, and sensitivity of Skoog in the Skoog iOS app, but Choose sounds in GarageBand.

Setting up GarageBand:

For the smoothest workflow with Skoog you need to make sure GarageBand is set to 'Run in Background' and 'Use with music apps' in settings.

You access settings in GarageBand via the wrench icon in the top right corner of the screen when the GarageBand app is open.

Setting up Skoog:

Connect Skoog via Bluetooth Midi Devices Menu in the Skoog App.

Set Sensitivity and Threshold as desired.

Tip - Try starting with Threshold 3 and sensitivity medium. Higher threshold will make Skoog easier to handle without playing notes/triggering unintentionally. Lower threshold gives more sensitivity for those who have less range/strength in their movement. Play around with threshold, sensitivity and response to explore how you can interact with Skoog.

Tip - Turn off 'Automatic key detection' (You will be setting the key/notes manually). Turn polyphonic mode 'on' in note settings, you can play more than one side at a time BUT remember you can't play opposite sides.

Skoog Settings

In the Skoog App turn Audio 'off' and turn MIDI 'on'

Choose a pentatonic Scale

(Or use iTunes/Spotify automatic key detection)

Or use the note selection to choose your notes individually per side/color.

Now let's play GarageBand instruments:

You can use the Skoog to play any of the instruments GarageBand.

In the tracks view, scroll through the carousel and choose your sound:

The Skoog App Quick Guide:

1. Bluetooth Midi Devices Menu

2. Notes & Scales Menu

3. Instruments Menu

4. Settings Menu

5. Music Library Menu

6. SongBook

7. Midi Menu

8. Swift Playgrounds Information

9. Skoog App Volume

10. Help Menu

11. Guided Access Mode (Deactivates menus)

12. Calibrate Button
